

What does MTSS look like at McBain Elementary School?

Teacher identifies student of concern and collects data

MTSS meeting is held to brainstorm ideas and interventions for student of concern

Interventions implemented and monitored for 6-9 weeks

Follow up meeting is held to evaluate data, and determine appropriate Tier placement

After Tier 2 interventions are exhausted student may be recommended for Tier 3 referral

After additional assessment, student may qualify for an intervention plan, 504 plan, or Special Education services
